

Experience Pure Water with BRINE SOFT

Are you tired of dealing with the negative impacts of hard water on your industrial ,Medical and daily life appliances due to higher maintenance and replacement costs? Discover the optimal solution with BRINE SOFT range of high-quality water softening salts. Our products are meticulously developed to cater to various applications, ensuring efficient and trouble-free operation for both industrial and domestic purposes.

Why is BRINE SOFTSs your best choice.

- > Sourced from otherwise untouched ancient subterranean salt beds in the Kindom
- > Refined to the highest purity levels sodium chloride through the triple refining technology with unique grain size.
- > Compacted under extreme pressure using the italian technology for highest product density.
- > In-Process Quality Control; all actions performed during production to verify that the products meet the requirements

The Science Behind Water Softening

The efficiency of water softening installations depends on the quality of the softener salt used Learn how BRINE SOFT's water softening installations work wonders in removing calcium and magnesium ions through the ion exchange process. Our specially designed synthetic resin beads saturated with sodium ions ensure a thorough and effective softening process. Explore the importance of regeneration salt in maintaining peak performance, and discover how BRINE SOFT's unique production method ensures consistent quality and longevity.

The product is producing under the standards of.

- > EN973: Chemicals used for treatment of water intended for human consumption- Sodium chloride for regeneration of ion
- > EN 14805: Chemicals used for treatment of water intended for human consumption Sodium chloride for regeneration of ion exchangers.
- > EN 16401: Chemicals used for treatment of swimming pool water Sodium chloride used for electro chlorinator systems

ISO 9001 Quality Standard NSF standard HACCP Compliant

Optimal Brine Solution

Regeneration is seamless with BRINE SOFTs. Our high-pressure compacted regeneration salt tablet ensures even dissolution, preventing 'mushing' and the formation of impermeable cakes in your water softening system. Trust BRINE SOFT for consistent performance, maintaining its form over extended periods in the brine tank. We are using the latest italian technology in our production facility

Best Quality Assurance

Ensure maintenance-free and efficient water softening with BRINE SOFT. Our products, meeting the highest standards, guarantee smooth operation for your installation. Trust in BRINE SOFT for unparalleled quality. we are periodically collecting the sample in production time and testing in our internal laboratory to ensure the quality of the product.

Pure Perfection

BRINE SOFT uses only very pure refined salt, ensuring no harmful contaminants. Say farewell to pump and valve damage, and trust in the excellence of soft water without compromises. No sea salt or rock salt—just pure refinement.

Quality You Can Trust

BRINE SOFT adheres to the highest international standards, with ISO 9001 certification and compliance with HACCP protocol. Our commitment continues with products meeting the industrial standard for regeneration salt (EN 973 type A). Rest easy knowing BRINE SOFT products are contaminant-free, hygienically packed, and suitable for water softening systems that supply drinking water.

Versatility for Every Setting

Whether for industrial or household use,BRINE SOFT's assortment is tailored to meet your needs. Experience prolonged equipment lifespan and enhanced filter functionality with our high quality salt. The long-term benefits? Minimal service needs and significant cost savings for your water softening equipment. Choose BRINE SOFT for enduring quality and performance.

BRINE SOFT's Edge Over Regular Softener Salt

BRINE SOFT outshines regular salt with its high-pressure compacted regeneration salt, ensuring even dissolution and preventing issues like 'mushing.' Our unique production method, using very pure refined salt, sets us apart by maintaining form and preventing damage to pumps, valves, and the ion exchanger.

Trust BRINE SOFT for consistent quality, meeting stringent international standards, and delivering long-term efficiency, making it the superior choice for water softening.

Opef Chem takes pride in being a reliable manufacturer of BRINE SOFT products. we are Committed the guarantee to your applicants safe, maintenance free and long life using through the brine soft premium water solutions. softening With customer-centric approach, Opef Chem is your go-to partner for quality and efficiency in water treatment. Transform your water softening experience with BRINE SOFTs premium regeneration salts from today. Your path to pure, soft water begins here.

PRODUCTS SPECIFICATIONS
